TRUJILLO NAMED VICE PRESIDENT OF HEAVY INDUSTRIAL TURBINE PRODUCTS

ProEnergy Services recently announced the addition of Marcial Trujillo as the Vice President of Heavy Industrial Turbine Products. In his new role, Trujillo will manage the company's new Turbine Services division. The new division, the company's ninth, will be housed on the corporate campus in Sedalia, Missouri.

Prior to joining ProEnergy, Trujillo, a 30 year veteran of the industry, worked with the Wood Group, Chromalloy, PDVSA in Venezuela, and founded Industrial Turbine Technology.

Services which ProEnergy will provide through the Turbine Services division include: rotor repair and balancing; component refurbishment; complete overhaul of the units; state of the art welding processes, such as laser cladding, fusion and plasma arc welding and high temperature brazing; mechanical material removal processes; latest technology in non-destructive testing; and coating for high temperature conditions. The services will be structured to support the industrial gas turbine latest designs technology but will also cover earlier designed units.

ProEnergy provides integrated services to the global energy industry. The company has U.S. offices in Sedalia, MO; Atlanta, GA; Houston, TX; and Tulsa, OK; and overseas locations in Argentina, Mexico, Venezuela, Pakistan, Panama and Ghana. More information is available on its website at www.proenergyservices.com.
