PROENERGY ATTENDS 2009 COAL-GEN SHOW

ProEnergy Services recently joined more than 350 exhibitors at the 9th Annual [Coal-Gen](#) show. An estimated 4500 people attended the event, which is produced by PennWell. It was held at the Charlotte Convention Center in North Carolina.

“The Coal-Gen show is the place to learn about the coal industry’s latest cutting edge products and services, as well as issues effecting coal-fired plants,” said company Director of Domestic Sales, Robert Korey, who attended the show. “We also had the opportunity to talk about our new Turbine Services Division, where we will be able to repair and refurbish components such as steam turbine diaphragms and blades.”

The new Turbine Services division is the tenth for ProEnergy and is housed on their corporate campus in Sedalia, MO. The 30,000 square foot, state-of-the-art facility is slated to open October 1, 2009 and hosts the latest technology and equipment for all turbine component repair and refurbishment needs.

ProEnergy Services is an integrated service provider that delivers cost-effective, safe and reliable service to the global energy industry. The company has U.S. offices in Sedalia, MO; Atlanta, GA; Houston, TX; Tulsa, OK; and overseas locations in Argentina, Mexico, Venezuela, Pakistan, Panama and Ghana. More information is available on its website at www.proenergyservices.com.
