## PROENERGY PERFORMS COMBINED CYCLE RETROFIT FOR MONTGOMERY ENERGY

ProEnergy Services has been selected to startup and commission the retrofit project of a combined cycle generation facility operated by [Montgomery Energy Partners](#).

[ProEnergy](#) crews will startup and commission a 1X Rolls Royce Trent Unit in combined cycle for Montgomery's L'Energia project in Lowell, Mass. The project is expected to be complete in August. The plant has generation capacity of 80 mw.

ProEnergy provides cost-effective, safe and reliable service to the global energy industry. The company has U.S. offices in Sedalia, Mo.; Atlanta; Houston and Tulsa, and overseas locations in Argentina, Mexico, Venezuela, Pakistan, Panama and Ghana. More information is available on its website at [www.proenergyservices.com](http://www.proenergyservices.com).

Montgomery Energy Partners is a Houston-based energy development and asset management company that builds and manages power plants nationally and globally. In addition to the L'Energia project, Montgomery has natural gas generation facilities in Billerica, Mass., and Montana and wind generation in North Dakota. The company is an affiliate of Navasota Energy. More is available on its web site at [www.montgomerypowerpartners.com](http://www.montgomerypowerpartners.com).
