

## ProEnergy: Expansion and Growth

ProEnergy is expanding the campus at its Sedalia, MO., headquarters and construction has already begun on a 20,000-square-foot fabrication building. The facility will be engineered to support 10-ton and 5-ton cranes, which will be used for fabrication of steel carbon, stainless steel and pressure vessels the company requires. The work is expected to be complete in early November.

An additional 40,000 square feet will be added to the fabrication building in two phases. The next phase likely will be an expansion to allow the company to do turbine repair. Another phase will be 5,000-square-feet of offices for engineering and computer-assisted drawing (CAD) support. Jeff Canon said he expects to have about 50 people working out of the building by early 2009.

Another addition to the ProEnergy campus will be a two-story, 24,000-square-foot corporate office. (Pictured

above) Because of recent growth, ProEnergy has staff working from three different locations in Sedalia.

"We want to bring everyone under one roof," Canon said, adding that he expected the building to have more than 40 offices and multiple conference rooms. "We're not big on work stations. It's important to us that our employees have a nice work environment."

The office building will also

include a 1,200-square-foot training center for the training programs that ProEnergy provides to its employees, as well as to its customers.

Septagon Construction, of Sedalia, is handling the design-building projects for the 20-acre campus.

In addition to the Sedalia headquarters; ProEnergy has U.S. offices in Atlanta and Houston and overseas locations in Argentina, Mexico, Venezuela and Ghana.

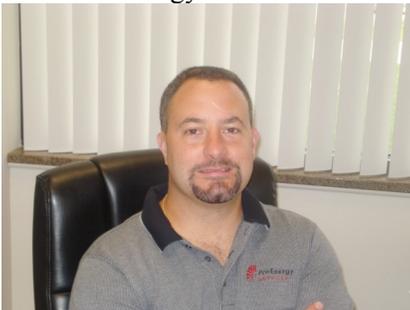

# WELCOME ABOARD!

From the Desk of  
**Cindy Howatt**  
Vice President of Finance

**Theresa Patton**  
Human Resources

ProEnergy welcomes Theresa Patton, who has joined ProEnergy Services as the Director of Human Resources. Teresa comes to us with 15 years in human resources experience. She is a Sedalia native who is happily married and a proud mother of two boys. With her rich knowledge and dedication to hard work, Theresa is a grand addition to the ProEnergy team.

**Robby Chapin**  
Environmental Health  
And Safety

We would also like to welcome Mr. Robby Chapin. Robby comes to us from upstate New York bringing with him over seven years of power

plant experience on industrial and aero gas turbines. He is also currently working on his Master's Degree in Occupational Safety. Robby has moved to Sedalia, MO along with his wife and two children, Samantha and Robby. Welcome aboard!

**Coming Soon!**  
**ProEnergy's New Web Site!**  
**Launching October 2007.**

## **AWARDS & RECOGNITION**

### **PES Recognizes:**

**S**afety Employee: Karen Koepke

With genuine care and concern for her fellow employees, this ProEnergy team member exemplifies all the best in our safety culture. Safety Employees are recognized by their peers as safety Leaders, for intervening to prevent an unsafe act or incident or for demonstrating consistent safe behavior and living our value of Safety: *Never Compromised*

I would like to take this opportunity to express ProEnergy's deepest appreciation to our exemplary accounting staff. Since our inception 5 years ago, ProEnergy has utilized a project-based accounting system. As my staff is well aware, this type of system is more demanding than a traditional accounting system. In addition, the complexity of our system is augmented by the fact that ProEnergy has 50 state-wide, international customer base which creates unique accounting challenges. Our staff has worked endless hours and used their ingenuity to resolve all accounting issues that have arisen. They have persevered and faced all challenges head on. We commend them for their success. My staff and I would also like to express our appreciation to the employees of ProEnergy Services. Their cooperation has been essential in our performance of numerous accounting functions. The success of our accounting department is truly the result of company-wide efforts. If anyone has any questions or suggestions, please do not hesitate to contact the accounting department. We are here to serve the customers and employees of ProEnergy Services.

*"Surround yourself with the best people you can find, delegate authority, and don't interfere."*

**Ronald Reagan**

**CELEBRATIONS!**

## **ProEnergy Celebrates 5<sup>th</sup> Anniversary and a Day @ the Ball Game!**

To celebrate our fifth anniversary, ProEnergy held a picnic for employees, their families and other special guests. The picnic was located at Bothwell State Historical Park. More than 200 people attended the Sedalia celebration, including employees from Texas, Georgia and those at ProEnergy overseas offices. Activities included a tour of ProEnergy headquarters, games, food and fun. Thanks to everyone for making this celebration a memorable event!

### **St. Louis Cardinals Game**

On May 27, 2007 ProEnergy employees and their family members gathered in St. Louis at Busch Stadium to enjoy a game between the St. Louis Cardinals and Washington. With an incredible 100% turn out from our staff, all enjoyed the event which was fully catered with nachos, ball park hot dogs, drinks and desserts. Although the Cardinals were defeated by Washington, it remained an event to remember.

# ProEnergy Spotlights

Pinckneyville Power Plant is located in Pinckneyville Illinois. Plant staffing consists of Lead Technician – Bruce Clarry and Plant Technicians – Sam Opp, Dennis Kellerman and Dave Haggard.

Plant staff has managed to maintain all eight units and Balance of Plant (BOP) equipment in a “Ready to Start” mode, answering the call of a total of 152 Dispatched Starts throughout the months of June and July without one failed start attempt. Even more impressive is the fact that the Pinckneyville crew has responded to a year-to-date total of 489 starts on these units. This is an outstanding accomplishment for which the Pinckneyville crew deserves hearty congratulations!

Above and beyond coordinating the daily efforts of plant staff, Bruce Clarry coordinated and conducted successful Annual CTG Maintenance and Inspections on all eight units. Bruce also continues to work on the Preventive Maintenance Program verifying we have identified all the maintenances we should be performing as well as attaching procedures to these.

On the forefront of everyone’s thoughts and concerns everyday, along with generation of electricity, is ensuring that the plant is in compliance with all environmental regulations and requirements. In this realm of responsibility, Sam Opp has taken the lead. He has done an outstanding job in coordinating special testing and permitting w/ Ameren and other entities as well as overseeing the day-to-day operation and maintenance of the “not so user-friendly” CEMS units. Sam has allowed us the ability to rest a little easier at night knowing that these concerns are in good hands and being managed efficiently.

In a continuous effort to provide Ameren with the highest numbers in Availability and Reliability, ProEnergy Services is in the process of implementing some Predictive Maintenance Programs throughout the Ameren Facilities. One of these programs is Vibration Analysis. Dennis Kellerman has stepped up to the plate and has taken the initiative with this program and has installed all the

# Pinckneyville Power Plant

“hockey pucks” on plant equipment and is moving on to the next phase of getting this program off-the-ground. Dennis also deserves special recognition in maintaining the plants, Water Chemistry Program, keeping a special eye on our Cooling Water, Chilled Water and Dematerialized Water Systems.

As a final note I would like to welcome to the ProEnergy Family our newest employee here at Pinckneyville, Mr. David Haggard. Although Dave didn’t start with us until the last days of January of this year, he has hit the ground running and has not stopped yet. He continues to impress everyone around him with his ability to learn and his ability to adapt to new situations. In short, Dave has become a very important part of this team in a short period of time and we look forward to having him amongst us as we head into the future.

That is all for now so, until the next time...keep ‘em turnin’ an’ burnin’.

Jim Conger  
Asst. Supt. Contract Operations  
Ameren – ProEnergy Services
