PROENERGY ADDS CONTROLS DIVISION

ProEnergy Services, an integrated service provider to the global energy industry, recently unveiled their twelfth line of business, ProEnergy Controls Solutions, led by Steve Huval. The new business unit will operate from offices in Fort Collins, Colorado and at the corporate headquarters in Sedalia, Missouri.

ProEnergy Controls Solutions works across multiple industries to design, integrate, install and maintain control systems for virtually all makes and models of gas and steam turbine driven generators and mechanical drive systems. The company is equipped to handle any size of project, from minor modifications, repairs, calibration and upgrades of existing controls to providing and installing custom-built solutions to replace practically any control system.

“Adding the Controls Solutions division is a logical next step for ProEnergy Services in our mission to provide our clients throughout the world with a seamless, single-source solution for services,” said company President Jeff Canon.

ProEnergy Services is an integrated service provider that delivers cost-effective, safe and reliable services to the global energy industry. The company has U.S. offices in Sedalia, MO; Houston, TX; Tulsa, OK and Fort Collins, CO; and international locations in Argentina, Mexico, Venezuela, Brazil, Panama, Pakistan and Ghana. More information is available on its website at www.proenergyservices.com.
