FROM THE DESK OF JOHN STEVENS - VP of SALES

It's my great pleasure to extend my sincere congratulations upon the 5th anniversary of ProEnergy Services.

Since ProEnergy's inception, we have made enormous accomplishments in the domestic as well as the international market place. Within a year of opening our new office in Sedalia, the local customer demand determined that the shop space wasn't enough. We needed to add to our 6400 sq ft shop another 5600 sq ft. With evidence that the market is starting to improve, we are investing in ourselves such as new tooling for the shop in Sedalia, the opening of a new office in Houston, a fifth business unit and additions to our management team, Al Simon, Director of Professional Services, Bill Shinholser, Director of O&M, Mike Venditto, Director of Technical Services, and Craig Vaughn, Director of Process Services. These varied backgrounds and depth in experience in the energy business will allow us to leverage additional platforms for business growth.

This is very exciting and I am very happy to be part of it all. I extend my best wishes for continued success to all of us. I am glad that ProEnergy is our vessel for professional and financial success for our families. Again, congrats to ProEnergy and all of you.

Get Well Wishes are Extended to: Ted's Zimmerman's wife, Debbie, and Kevin Milstred.

COMING SOON: A NEW WEBSITE! We are in the process of completely rebuilding and updating our website located at www.proenergyservices.com. This process should be complete within the next few months. Keep your eyes peeled for a new look and feel at ProEnergy Services!

ProEnergy Spotlights.....

GOOSE CREEK ENERGY CENTER

SUBMITTED BY KEN NEWTON

Starting Reliability, Year to Date 100%

Plant Availability, Year to Date 99.84% (Issues with the gas yard prevented 100%)

Gross Output, Year to Date 4263.6 MWh

Calibration's, Calibration's, Calibration's. Annual cal's have been the priority this month...Goose Creek has calibrated 132 instruments so far since March 1st, along with closing 122 job requests.

Gas Yard.....working with several vendors to upgrade to fuel gas regulating station as well as a new burner management system for the fuel gas heater.

Goose Creek facility is working with Predict Services to set up a Vibration Analysis Program for all of the pumps and motors throughout the plant that will save money on preventative maintenance costs and help increase overall plant reliability.

The plant has also completed their EMPRV transition to Ameren stock numbers for all spare parts. This has included identifying, labeling and stocking over 325 different part numbers and warehousing them into new bin shelving that Ameren purchased. This will allow anyone who logs into EMPRV able to check inventory and find any parts we have on site.

The facility will also be purchasing a new plant utility vehicle. Ameren has approved a Kawasaki Mule to use around the sight to replace their old Aquila golf cart.

Employee Activities

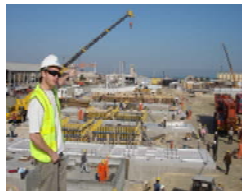

- Ken Newton had surgery on his left arm. He is recovering nicely.
- Jeb Brodhead celebrated his 41st birthday January 9th. We celebrated this historic event with cake, oxygen and a walker.
- Pablo Aonzo is enjoying his transition to Illinois life. He has already been able to identify 33 different corn hybrids growing in Piatt County. His family is still adjusting to him wearing bib overalls to work everyday...according to Pablo, "I just want to fit in with the locals!"
