PROENERGY INTRODUCES NEW DIVISIONS AT POWER-GEN

ProEnergy Services recently introduced two new service divisions at the 2009 Power-Gen International Trade Show in Las Vegas. The fast-growing, integrated service provider recently launched Turbine Services and Renewable Energy Services and communicated that to the 18,000 power industry professionals on hand at the three day show.

Power Gen is produced by Pennwell Publishing Corp., and is considered the world's largest Power Generation Show. This year's event was held December 8-10.

ProEnergy recently completed construction of a 50,000 square foot, state-of-the-art Turbine Services facility. The Renewable Services division provides customized services to assist renewable and alternative energy owners in generating sustainable power.

ProEnergy Services is an integrated service provider that delivers cost-effective, safe and reliable services around the world. The company has U.S. offices in Sedalia, MO; Houston, TX; Tulsa, OK; and overseas locations in Argentina, Mexico, Venezuela, Brazil, Pakistan, Panama and Ghana. More information is available on its website at www.proenergyservices.com.
