## PROENERGY ADDS HIGH VOLTAGE SERVICES

ProEnergy Services has recently launched a new division to provide high voltage services to power generation customers. This new service further expands the company's single source capabilities, offering innovative power solutions to major energy providers throughout the world.

ProEnergy's High Voltage division gives customers the competitive advantage of speed and technical knowledge through its services related to construction, testing, maintenance and training of high voltage substations.

The company's services include:

- Assembly and installation and commissioning of HV equipment
- Project management for substations and HV services
- Fault analysis
- Maintenance plans, RCM and preventative maintenance
- Custom training programs for operators and maintenance crews
- Infrared inspections

ProEnergy is an integrated service provider that delivers safe, reliable solutions to clients throughout the world. ProEnergy provides a variety of professional services, parts and equipment to the energy industry. The company has U.S. offices in Sedalia, Mo.; Atlanta, Tulsa and Houston; and overseas locations in Argentina, Mexico, Venezuela, Pakistan, Panama and Ghana.
