PROENERGY PROVIDES SERVICE AND SUPPORT FOR PAKISTAN POWER RESOURCES

ProEnergy Services was selected recently to provide complete operations and maintenance for the Bhikhi Power Plant in Pakistan.

The 136mw plant, owned by Pakistan Power Resources, has a GE LM6000PD and two GE LM6000PC natural gas turbines with enhanced sprint to boost generation.

[ProEnergy](#) has placed a professional crew on site to provide complete control of the plant's day-to-day operation, as well as all maintenance services. The three-year operations and maintenance contract continues until Spring 2011.

ProEnergy provides cost-effective, safe and reliable service to the global energy industry. The company has U.S. offices in Sedalia, Mo.; Atlanta; Houston and Tulsa, and overseas locations in Argentina, Mexico, Venezuela, Pakistan, Panama and Ghana. More information is available on its website at www.proenergyservices.com.
